-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, 11-19, drawn to a method of differentiating normal and hyperparathyroidism in a person, classified in class 435, subclass 7.1.
  - II. Claims 7-10, drawn to a method of differentiating normal and hyperparathyroidism in a person, classified in class 436, subclass 514.
  - III. Claims 20-30, 34-43, drawn to monitoring parathyroid related bone disease and treatments, classified in class 436, subclass 15.
  - IV. Claims 31-33, 44-46, drawn to monitoring parathyroid related bone disease and treatments by determining and comparing at least two parameters, classified in class 435, subclass 7.95.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the feature of differentiating between a person having normal parathyroid function and hyperparathyroidism by determining and comparing at least two parameters in invention I, is not required by the claims of other groups. The feature of differentiating between a person having normal parathyroid function and hyperparathyroidism by determining and comparing one parameter in invention II, is not required by the claims of other groups. The feature of monitoring parathyroid related bone disease and treatments by determining and comparing at least two parameters in invention III, is not required by the claims of other groups. The feature of monitoring parathyroid related bone disease and treatments by determining and comparing one parameter in invention IV, is not required by the claims of other groups.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, the search required for one group is not required for the other, therefore restriction for examination purposes as indicated is proper.

Art Unit: 1641

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Cheu whose telephone number is 571-272-0814. The examiner can normally be reached on 9:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long Le can be reached on 571-272-0823. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
